Dear Hiring Manager:

Please accept this letter and my résumé as an expression of interest in joining your organization as a **Software Engineer**.

In my previous job experiences, I have performed my assignments with a high degree of skill and professionalism. My current objective is to obtain a position that will utilize my skills and offer an opportunity for continued professional growth.

I possess strong skills in computer architecture, usability and software engineering, and technical support. I believe in excellence and have always dedicated myself, my talents and my creative abilities to assure the successful accomplishment of any goals. My positive attitude and willingness to give the best makes me a valuable asset to any organization that would employ me. In addition, I have outstanding people skills, able to communicate well at all levels.

Currently, I am exploring opportunities that would benefit organization's success and serve as a source of new possibilities. The enclosed résumé summarizes my expertise, experience, and other information you will find helpful in understanding of my background.

If you are seeking professionalism from someone with my qualifications, I would welcome a personal interview. I appreciate you taking time to review my credentials.

Thank you for your time and consideration.

Sincerely,

Hualong Li

QUALIFICATIONS PROFILE

Detail-oriented, versatile, and highly motivated professional, interested in pursuing an engaging career as a **software engineer** to utilize knowledge and skills honed from academic foundation. Knowledgeable of software development and engineering, project coordination, and computer science. Armed with unparalleled work ethic and proven capabilities to handle increasing responsibilities while thriving within fast-paced environments.

EDUCATION

Bachelor of Science in Computer Science: 2019 ▫ Oregon State University, Corvallis, OR
Bachelor of Science in General Chemistry: 2012 ▫ University of California–Irvine, Irvine, CA
Coursework in Pre-chemistry: 2010 ▫ Mount San Antonio Community College, Walnut, CA

CORE COMPETENCIES

- Knowledge of web development, computer architecture, network security, and usability engineering
- Efficiency in identifying and addressing technical issues within scientific, engineering, and mathematical fields
- Capability to create various web and mobile applications, software systems, as well as databases
- Skills in designing tools and workflow for modern mobile structures
- Strong familiarity with programming language fundamentals, operating systems, computer networks, and assembly languages
- Technical proficiency with C++, Java, SQL, HTML, CSS, , JavaScript, JSON, Git and Open Source; with working knowledge of Java and Python

WORK CHRONOLOGY

Advanced Botanical Consulting and Testing, Walnut, CA

Analytical Chemist   Apr 2015-2018

- Adapting to the cGMP prescripts while supplying analysis of in-coming samples

- Method validation

- Training new chemists on latest techniques and equipmen

PERSONAL SKILLS GAINED FROM THE WORK

- Accuracy – I had to make sure that there is no mistake or error before I released the result.
- Teamwork- I had to work with others in a chemistry lab. To work well as a team member, I have been learning a lot about how to communicate with others. I am easy to communicate with others because I am a honesty, kind and Ethical person.
- Reliable – To become reliable, professional skills are needed. I always tried to learn new skills all the time to keep myself being reliable.
- Flexibility- Usually, I was assigned 40 samples per week, and different sample has different deadline. I learned how to create plan to finish them on time and also learned how to deal with some rush sample may break the plan.

ACADEMIC PROJECTS

Oregon State University, Corvallis, OR

Project Name: **Capstone Project**	2019

https://github.com/alexli77/hello-world/blob/master/TBA2%2520Poster.pdf
https://github.com/alexli77/hello-world/blob/master/TBA2%2520Final%2520Report.pdf

I was so surprised by the potential creativity of my team members. All members may come up different ideas, and we put all the ideas into the game. I loved the feeling that we can create a game from zero, and we build it as what we wanted. Details of the project will show on my personal web.

Role:

- Developed overall game while creating several verb functions and checking bugs manually
- Build the script of the game.
- Hold some team meetings.

Project Name: **Usability Engineering Project**

https://github.com/alexli77/hello-world/blob/master/Group%209%20Prototype%20FINAL.pdf

This project is to create a UI for a program. I came up a idea of an app which can receive and mange the digital receipts. Few people joined my group to help me finish the UI of it. It was not done after we create the UI, we had to introduce it to others, and also interviewed others to get suggestions.

- Demonstrated competency in designing project prototype by working on the UI
- Inform and interview my co-worker about the UI.
- Hold some group meetings.
